

BISHAL SINGH

UI/UX Designer | Product Designer | User-Centered Design | Frontend Developer

Bangalore, India | +91 6370910038 | bishalsingh2000singh@gmail.com | bishalsingh.in

PROFESSIONAL SUMMARY

UX/UI Designer with 4+ years of experience designing intuitive, user-centered digital experiences for B2B and SaaS products. Skilled in user flows, wireframing, prototyping, design systems, and usability best practices using Figma. Experienced in translating business requirements into intuitive interfaces that improve user experience and streamline complex workflows. Strong collaborator with product managers, stakeholders, and developers in Agile environments, ensuring seamless execution from concept to implementation. Additionally, possesses frontend development knowledge in HTML, CSS, Bootstrap, JavaScript, and Angular, enabling effective communication with engineering teams and design feasibility assessment.

CORE SKILLS

UI/UX Design Principles: Figma (Wireframing, Prototyping, Auto Layout, Components, Variables, Dev Mode), High-Fidelity Mockups, User Flows, Information Architecture, Interaction Design, Design Systems, Usability Testing, Journey Mapping, Accessibility (WCAG 2.1)

Front-End Development: HTML5, CSS3, Responsive Web Design, Cross-Browser Compatibility, Performance Optimization, SCSS, Bootstrap 5, Tailwind CSS, JavaScript, Design-to-Code Handoff

JavaScript Frameworks : Angular 15, Component-Based Architecture, REST API Integration

Tools & Collaboration: Git, GitHub, Jira, VS Code, Photoshop, Agile/Scrum, Sprint Planning, Code Reviews, Cross-Functional Collaboration

WORK EXPERIENCE

UI/UX Developer & Frontend Developer — Interland Technology Services Pvt. Ltd. Jan 2022 – Jan 2026

PayzoBooks — SaaS Accounting Platform (Figma, Angular, HTML, CSS, JavaScript)

- Designed and developed responsive user interfaces for invoice, billing, vendor management, authentication, and accounting workflows.
- Translated Figma designs into reusable Angular components, ensuring pixel-perfect implementation and design consistency.
- Built and maintained a scalable design system with reusable UI components, improving development efficiency and user experience.
- Collaborated with cross-functional Agile teams to optimize performance, accessibility, and application usability.

Indeal — B2B Marketplace Platform (Figma, Angular, HTML, CSS, JavaScript)

- Designed user flows, wireframes, and high-fidelity interfaces for buyer and seller marketplace experiences.
- Developed responsive Angular interfaces from Figma designs using reusable components and modern frontend practices.
- Simplified complex B2B workflows through intuitive information architecture and user-centered design.

- Partnered with product managers and backend developers to deliver scalable, accessible, and cross-browser compatible solutions.

TradeShare.ai — B2B Procurement & Trade Automation Platform (Figma, HTML5, CSS3, JavaScript)

- Translated complex Figma designs into responsive, production-ready web interfaces using HTML5, CSS3, and Vanilla JavaScript.
- Developed reusable UI components and interactive user experiences for enterprise procurement workflows.
- Improved website performance and accessibility through semantic HTML, optimized assets, responsive layouts, and clean JavaScript.
- Collaborated with designers and stakeholders in Agile teams to deliver scalable, user-centric frontend solutions.

Al Faris International School — Educational Website (Figma, WordPress, Elementor, HTML5, CSS3)

- Designed responsive UI/UX solutions in Figma by creating wireframes, visual designs, and reusable design components.
- Developed and customized the WordPress website using Elementor, converting Figma designs into responsive web pages.
- Improved usability through thoughtful information architecture, typography, spacing, and mobile-first layouts.
- Collaborated with clients throughout the design and development lifecycle to deliver an accessible, high-quality website.

PERSONAL PROJECTS

Rentoss — Property Rental Mobile App (Figma: Wireframing, Prototyping)

- Designed end-to-end UX in Figma for a mobile-first property rental app across 33 screens — onboarding, search, filtering, property detail, and booking — using wireframing and high-fidelity prototyping.
- Applied information architecture and user journey mapping to reduce the booking flow, validated through prototype walkthroughs and usability testing.
- Built a modular Figma component library with auto-layout and responsive frames.

RG Infra — Construction & Infrastructure Website (Figma: Wireframing, Prototyping, Responsive Web Design)

- Designed a conversion-focused corporate website in Figma — wireframes, project showcases, service pages, and contact flows — applying design thinking principles to optimize for lead generation.
- Built a responsive front-end across desktop and mobile breakpoints from the high-fidelity Figma designs, simplifying a dense service-category navigation structure into a clear, intuitive user journey.

EDUCATION

Master of Computer Applications (MCA) — GITA Autonomous College, Bhubaneswar 2020 – 2022

KEY ACHIEVEMENTS

- Designed and shipped a Figma-based design system adopted across 8+ product modules at PayzoBooks, building the matching front-end component library to keep design and code consistent at scale.
- Improved invoice creation usability by identifying friction points through heuristic evaluation and walkthroughs, then designing and coding the front-end fixes.
- Delivered a 33 screen Figma prototype for the Rentoss mobile app using wireframing and prototyping, reducing booking complexity.
